

FUSRAP Status: Borough of Lodi

LODI

Radio Tower
WABO

Legend	
	Surveyed under FUSRAP, not contaminated
	FUSRAP Vicinity Properties (remediated or scheduled for remediation)

Potential areas of FUSRAP waste under roadways and rights-of-way. Contact U.S. Army Corps of Engineers (201-226-6608) before digging.

The Formerly Utilized Sites Remedial Action Program (FUSRAP) was established by the federal government in 1974 to identify and clean up contaminated sites from the early years of the nation's atomic energy program. The Maywood Site was not associated with that program. It was added to FUSRAP because it formerly housed a commercial operation that extracted thorium (a naturally-occurring radioactive ore) from monazite sand. The site was added to the Environmental Protection Agency's National Priorities List of hazardous waste sites in 1983. The U.S. Army Corps of Engineers assumed responsibility for FUSRAP in 1997.

Note: The location and status of the vicinity properties shown on this map are for general reference only. The USACE is reviewing historical archives to confirm the accuracy of the property locations and status depicted on the map. If you have specific questions about a particular property, please contact the USACE Public Information Center at TSA West Pleasant Avenue, Maywood, New Jersey or call 201-843-7466. Or, visit the FUSRAP Maywood Superfund Site website at www.fusrapmaywood.com.

Stream and drainage information compiled from field surveys, U.S.G.S. Quad sheets and aerial photographs/surveys.
