U.S. Department of Energy

United States Government

Department of Energy

Oak Ridge Field Office

memorandum

DATE: January 4, 1993

REPLY TO
ATTN OF: EW-93:CangeSUBJECT: MAYWOOD AND WAYNE SITES -- DOCUMENTATION OF 12/18/92 BI-MONTHLY PROJECT
MANAGER'S MEETING

to: File

On 12/18/92, representatives from DOE and EPA met in Region II to discuss the preferred remedy for Maywood. Jeff Gratz and I agreed that this meeting would meet the requirements of the bi-monthly project manager's meeting. Several items were raised during this meeting including:

1. Prior to release of the Proposed Plan, DOE should investigate the viability of Maywood waste disposal at a DOE site;
2. DOE should assess now, rather than after the ROD, the potential exposure to employees working where contamination is proposed to be left in place; and
3. DOE should consider issuing a single ROD for Maywood while still allowing phased implementation of the selected remedy (i.e.; identify now the remedy for future phases with contingencies in place).

If you have any questions, please call me at 6-5724.

Susan M. Cange, Site Manager
Former Sites Restoration Division
