and Energy
5th Floor, CN 028
401 East State Street
Trenton, NJ 08625

Dear Mr. Marton:

MAYWOOD & WAYNE SITES - PROJECT OPERATIONS PLAN FOR THE SOIL WASHING TEST PROJECT

Enclosed, for your information, are four copies of the Project Operations Plan for the Soil Washing Test Project of the Wayne and Maywood Soils at the K-25 Site. Please note that this plan was not written to be a detailed, work controlling document. It provides a generic overview of our planned activities, along with certain guidance information for work to be implemented through FUSRAP's existing procedures and task specific work instructions. As we have discussed, the first campaign of testing will be conducted with soils from the Maywood storage pile. Approximately 100 tons of this material has been sent to Oak Ridge; testing is scheduled to begin next month. A sampling and analysis plan has also been developed and is being finalized. A copy will be forwarded to you within a few weeks.

Please contact me at (423) 576-5724, if you have any questions about this document.

Sincerely,

A handwritten signature in cursive script that reads "Susan M. Cange".

Susan M. Cange, Site Manager
