Dear Ms. Connell:

**MAYWOOD SITE - TECHNICAL MEMORANDUM FOR CHARACTERIZATION DATA IN
LODI, NEW JERSEY**

Please find enclosed a copy of the Technical Memorandum for the results of recent characterization efforts at some of the Maywood site vicinity properties.

I understand that you are conducting a Health Consultation in the Maywood, New Jersey, area and that you may be referencing characterization data produced in 1989 by the Department of Energy's (DOE) Formerly Utilized Sites Remedial Action Program (FUSRAP) regarding area properties.

The most recent characterization sampling, carried out in March 1995, served to address gaps in earlier data. The effort successfully produced a more accurate portrayal of the extent of contamination at the vicinity properties that will be addressed during Phase I remedial action at the Maywood site, which begins this fall. The data within the enclosed document supersede some of the information that you may be referencing in the 1989 reports.

If you would like to talk about the new data or about DOE's work at the Maywood Site and in surrounding communities, please feel free to call me. My number in Oak Ridge, Tennessee, is (615) 576-5724.

Sincerely,

A handwritten signature in cursive script that reads "Susan M. Cange".

Susan M. Cange, Site Manager
Former Sites Restoration Division
