June 13, 1995

Paul A. Giardina, Chief
Radiation Branch
Environmental Protection Agency
Region II
Jacob K. Javits Federal Building
New York, NY 10278

Dear Mr. Giardina:

DOE-OWNED NEW JERSEY FUSRAP SITES - SEMIANNUAL RADON FLUX MONITORING RESULTS - SUBMITTAL TO EPA REGION II

Enclosed for your consideration are the results of radon flux monitoring conducted at the following sites in Region II being administered by the Department of Energy (DOE) under the Formerly Utilized Sites Remedial Action Program (FUSRAP): the Maywood Interim Storage Site (MISS) and the Middlesex Sampling Plant (MSP).

The monitoring information is being provided for your information in the spirit of the draft Memorandum of Understanding between DOE and EPA to provide data under 40 CFR part 61, Subpart Q, of the National Emission Standards for Hazardous Air Pollutants (NESHAPs).

The enclosed data are for the interim storage piles at MSP and MISS. The data includes the results of semiannual monitoring conducted in March of 1995. Results of the monitoring indicate that both the MISS and MSP sites are in compliance with the radon flux standard of 20 pCi/m²/s.

If you have any questions, please contact me at (615) 576-0730.

Sincerely,

A handwritten signature in black ink, appearing to read "Lester K. Price".

Lester K. Price, Director
Former Sites Restoration Division
