Stuart Price

Dear Sir/Madam,

In November 1995, the Maywood Board of Health in cooperation with the Department of Energy sponsored an information session relating to radioactive contaminated soil in Maywood, Lodi and Rochelle Park.

The session was directed to general utilities and other agencies that may have occasion to excavate soil in these communities. The session reviewed site information, and safe work practices.

Attached is site specific information prepared by the DOE.

I trust you will find it helpful in identifying specific areas of contamination.

Very truly yours,

Mary Carton
